

Eason Tang

FRONT-END DEVELOPER · IOT SaaS & FINTECH

Taipei, Taiwan

✉ tang0103@icloud.com | 🏠 superbeeee.com | 📷 superbeeee | 🌐 tang0103

Summary

Front-end developer with 4 years of product delivery across IoT SaaS and FinTech. Most recently at Cayin Technology, owned the frontend of **go-Cayin's** Device Management module —partnering with PMs, designers, and backend / Mobile teams via Swagger to ship features for enterprise clients. Comfortable diagnosing production issues independently (cross-subdomain auth, browser-rendering bugs), refactoring complex components for maintainability, and translating ambiguous business requirements into concrete UI.

Experience

Cayin Technology Co., Ltd.

Front-End Developer

Taipei, Taiwan

Mar. 2024 – Mar. 2026

- **Customer requirement translation & troubleshooting:** understood enterprise clients' device-management needs and independently diagnosed and resolved a **cross-subdomain authentication issue** on gocayin.com —root cause in Same-Site Cookie and axios **withCredentials**, fixed without escalation.
- **Cross-team API collaboration:** used Swagger documentation as the shared contract with backend and Mobile teams to align API schemas before implementation, reducing integration back-and-forth and keeping real-time device data in sync across platforms.
- **Client self-sufficiency as a design principle:** built the EPD device-management portal so non-technical operators could manage image upload and slideshow scheduling without calling technical support.
- **Code maintainability:** refactored complex Device Management components into reusable composables, reducing single-file complexity by **~40%** and lowering client-facing regression risk.

Alpha Robo-Advisor

Front-End Developer

Taipei, Taiwan

Jun. 2022 – Nov. 2023

- **Translation layer between PM, designers, and backend:** turned ambiguous business and compliance requirements into concrete, actionable specifications; explained technical constraints clearly to non-engineering stakeholders.
- **Third-party API integration:** collaborated with backend via Swagger to integrate RESTful APIs (SinoPac Securities data exchange, Yahoo / Google OAuth), completing **25%** of planned endpoints and resolving integration issues as they arose.
- **Data-driven iteration:** implemented GA4 + GTM tracking on the Yahoo co-marketing page, ran A/B tests, and translated funnel data into concrete recommendations the marketing team acted on.
- **Complex product visualization:** built the interactive Alpha Stable Return product page —broke down financial-simulation logic into a step-by-step user flow with EChartsJS dynamic charts.

PricewaterhouseCoopers (PwC Taiwan)

Auditor (Assurance Services)

Taipei, Taiwan

Sep. 2021 – Nov. 2021

- Conducted on-site client audits —built client trust face-to-face and developed the habit of asking the right questions before drawing conclusions. Processed large datasets with Excel Pivot Tables and VLOOKUP under compliance constraints.

AI Native PM: An Agentic Workflow From Market Research to Engineering Delivery

May 2026

- End-to-end case study using my side project HaoYuanShu: source curation with Claude WebSearch, competitive research via NotebookLM challenger prompts, MRD/PRD authoring with Claude Code, openspec for scope boundaries, and Playwright agent-driven acceptance testing —including the five concrete corrections I made to AI-generated specifications.

SDD in Practice: Building HaoYuanShu with Claude Design, openspec & Claude Code

May 2026

- Build log of shipping an iOS app in two weekends with a Spec-Driven Development workflow —what AI got right (React Native scaffolding, component generation), what required human override (wooden-fish counting logic, immersive-mode UI restraint, device-only debugging cycles).

Skills

Frontend	Vue 3 / Composition API, JavaScript / TypeScript, HTML, CSS, Pinia / Vuex, Composable Architecture, EChartsJS, Vite
Backend Integration & Tooling	RESTful API, Swagger, Cross-subdomain Authentication, GitLab CI/CD, Git, GA4 / GTM, A/B Testing, Figma
Domain	IoT device management, B2B enterprise SaaS, Digital signage, FinTech / robo-advisor
Languages	Mandarin Chinese (Native), English (Professional working — IELTS 6.0, TOEIC 845)

Education

Yuan Ze University

B.B.A., Double Major in Accounting and International Business

Taoyuan, Taiwan

Sep. 2016 – Jun. 2020
